Goal:

Act as a Front-End React/NextJS Developer.

Formação:

Graduated in Information Systems - Faculdade Sete de Setembro - 2009 to 2014

Profissional Experience:

Front-End Developer – INTERFACE IT (Fortaleza-CE) – 01/12/2020 a 22/07/2021

- My first professional experience started with the development of components for an ongoing project, using React to customize pre-existing components of the online Microsoft Sharepoint platform.

- I worked on the development of a corporate intranet system, offering several functionalities for use by the company's employees. Components such as sliders, accordion, menu, player, news feed, among others, were customized to meet the customer's needs. API calls were made directly in the context of sharepoint online for use in components.

Front-End Developer – DART Digital (Ribeirão Preto-SP) – 25/07/2021 a 13/02/2023.

- Robust, performant code building with modern writing, for a set of customers and internal projects.

- Working with a variety of languages, frameworks and libraries such as: Javascript , Typescript, React , AngularJS , Material UI , Ant Design and etc.
- Timekeeping and task management using Jira.
- Communicating and collaborating with my team of developers, customers and producers on a daily basis.
- Consuming API via Swagguer UI and collaborating in identifying bugs, reporting to the backend developers team.
- Working in several libraries and making customizations according to customer requests.

Languages:

- B2 English
- Native Portuguese

Courses:

- Complete Modern Web Course with Advanced Javascript + Projects – Udemy – Workload of 87.5 hours.
- Intensive programming course in Typescript React, ReactNative and Node JS Gotack Bootcamp – Rocketseat – 160 hours
- Intensive programming course in React/NextJS FrontEnd Ignite 2021 and 2022 – Rocketseat.
- Intensive programming course in React Native FrontEnd Ignite – Rocketseat.
- Intensive programming course NodeJS 2022 – Rocketseat .

Skills:

- Programming languages:

  Javascript (ES6) , Typescript , HTML , CSS/SASS .
- Libraries and Frameworks:

  React , React Native , Node , Styled Components, NextJS , Material UI , Antd, TailwindCSS , Redux, Express, Rest API , Jest .
- Tools and Platforms:

  Git, Jira, Azure, Docker , Firebase, Netlify, DBeaver, Prisma and Typeorm.
- Others :
- Scrum Methodology and SOLID Architecture.

Personal Projects:

- Project Coffee Delivery
- Application built in React and using TailwindCSS. The application consists of managing a shopping cart for a fictitious coffee shop. The application was built from scratch based on a figma model.
- Project Feedback Widget :
- It is an application aimed at registering complaints or ideas suggested by the User, using notifications via e-mail and comments with screenshot. The application was built at the NLW event and then new features were exclusively created by me, features such as: Dark Mode, Dashboard of generated notifications and user authentication via Google, Facebook and E-mail.
- Project My Portfolio:

  It is a bilingual application built on React and AntDesign.

  The application consists of presenting my portfolio with a brief introduction about me, contact information and built projects.
